Newsletter May 5th 2023

Literacy

In Literacy, students have been practicing their descriptive writing skills. Students edited simple sentences by adding adjectives, fronted adverbials, and subordinating conjunctions. They also read different story extracts, and used their descriptive writing skills to add to the original stories.

Next week, students will have a listening, writing, and reading test as well as a spelling test.

Maths

In Maths, students have been practicing different topics to study for the upcoming progression tests. Students focused on reading 24-hour and 12-hour clocks, calculating angles and polygons, working with median, mode, range; and organizing data using Venn Diagrams.

Next week, students will be completing two tests for Maths.

Science

In Science, students learnt about the different life cycles and processes of animals, including humans. We have also practiced other parts of the science curriculum in order to prepare for the progression tests.

These topics included the water cycle, sea pollution and its effects, and sound. Students will be completing two tests for Science next week.

ICT

In ICT, students have continued using PowerPoint to work on their stories related to E-Safety.

Important Notices

Students should use their subject workbooks for Science and Maths to study for their tests.

Please make sure that your child arrives at school on time. The bell for class rings at 07:55, so students should be at school latest by 08:00.

Happy birthday, Kodom!

Congratulations to Linna, Ellin, and Dalika for receiving a Star of the Month award!
