

Year 6A

With Mr Sinan
October 2019

Welcome to our latest newsletter
We've had a very busy and fun month in the 6A classroom. Our learning year is in full force, and we are embracing all our school activities with full hearts.

Literacy
One of the highlights in our literacy lessons has been our "Write like you speak!" workshops. Students have been writing a blog post based on a topic that they love. As part of Library Week, we've also been reading our favourite books in our favourite places. This month has been all about bringing joy to Literacy.

Maths
Geometry! We loved learning about the wonderful world of angles, triangles and polygons. Most of all, we loved working with circles, and discovering the secrets of 'pi' (3.14). Since then we have also covered fractions, decimals and percentages.

Inspired by our lessons in PSHE, and the work of environmental activists around the world, this month we created action posters to highlight some of the most urgent environmental problems around the world.

Science
We are learning all about the human body, blood types, the circulatory system and hearts this month. We've measured our individual heart rates, and this week we will actually get to dissect a real pig heart!

Topics
After finishing up our Indus Valley projects, we have moved onto Geography and Coastal Seas. Our class have been inspired by David Attenborough's documentary "Our Planet" and we are currently working on information posters about the major threats that our coastal ecosystems face.

Stars of the Month
We have two stars this month! Holly, for being an extremely hardworking and kind member of our classroom. And Kim Hai, for adapting wonderfully to her new school and trying her absolute best everyday. Well done girls!

- Reminders**
- Healthy snacks are better for learning.
 - Please try to avoid single use plastics and packaging .
 - PLAY is extremely important for the development of a child.
