

**Stars of the Month**

## Literacy

The students continue to develop a love of books and reading through Daily 5 and our trips to the library. Children read African counting stories with repeating patterns and they discovered all kinds of animals with exciting children's safari through the grasslands of Tanzania. This made counting and reading fun.

## Maths

We have been estimating and comparing weight. Children also used balancing scales to measure different weights of objects within the classroom. A strong emphasis was placed on developing practical measuring skills and making estimates. We then moved on to learn about odd and even numbers.

## Science

Pupil's in Y1A can recognise the difference between the name of an object and the material from which it is made. They can identify a range of everyday materials and describe the physical properties. They understand how to group everyday materials according to their physical properties.

## Reminders

- ♦ Sports Day is on **Thursday 13th February**.
- ♦ School fair is on **Saturday 7th March**.
- ♦ School photos are ready to purchase.
- ♦ PE on **Tuesday** for full time students and **Wednesday** for everyone.
- ♦ Homework will be given on **Mondays**. Please complete all homework and return it by **Friday**.
- ♦ Library books to be returned on **Thursdays**.
