THE HIGH SCHOOL NEWSLETTER

FEBRUARY 2022 ISSUE

Assemblies at ISSR

Assemblies are a regular Monday morning event in school once again. So far, these have included an excellent presentation by our Science teacher Mr. Tony and his class on how we calculate the speed of light using an egg white and a microwave (!) and on the 14th February, our SRC celebrated the day with various extremely enjoyable and varied events.

Extra-Curricular Activities

We have a very varied selection of ECAs in progress this term. These include Ms. Lee's spectacular 'Art on the Wall' project to enliven our outdoor spaces, Ms. Claudia's creative 'DIY Home Decor' and Mr. Chris' class creating a bird feeder for his wildlife conservation group.

Field Trips are up and running again!

Year 8 full-time students enjoyed a wonderful day out at Kulen Mountain. We saw the spectacular scenery, the Thousand Lingas, the Giant Reclining Buddha and also took the opportunity to swim in the waterfalls. We rounded everything off with a picnic and it was a day the students will never forget.

Hopefully, we will be able to continue field trips at fairly regular intervals in future as they provide a great way to educate our students, especially in history, geography and science.

Welcome to our new PE teacher

We are delighted to welcome our new PE teacher, Mr. Anthony to the ISSR team. He hails from the Philippines and brings to us many years of teaching experience, both in Phnom Penh and in Siem Reap. He has settled in exceptionally well and seems to have already formed a great relationship with our students.

Upcoming Event Sports Day

Preparations are in progress for our High School Sports Day and are being organised by Mr. Anthony right now. This will take place on March 14th on the High School premises. It is another step in the right direction of getting us back to normal school activity.

We have been making preparations for our forthcoming mock exams which begin the week commencing February 28th and run until March 28th.

These are an extremely important way of determining the standard of students' work leading up to the final exams later this year, helping us determine any difficulties they might encounter and therefore help with these in the coming months.

Khmer Stream Achievement on Yr12 National Exam – Yang Sanya

Yang Sanya of Year 12 achieved the remarkable feat of achieving an A grade which was rewarded with a Microsoft Surface 8 Pro from ISSR and a moto from the Siem Reap Governor. She also passed the Royal University of Fine Arts Entrance exam. Well done!
