

# I S S R

Newsletter Thursday 14th December, 2022

With Ms. Heather

## Literacy

We have learned to: Read, write and speak with better accuracy.

This week we learned about presenting a stage performance. We learned about props and how to create them for to impress our audience. We created a beautiful prop for center stage. We also transferred our knowledge of different cultural party snacks.

## Math's

We are learning to:

This week we had a practical application to review time and punctuality. We went on a field trip and worked out how long it took to arrive at our venue; how long we spent there. We were surprised by how long we took over snack time, and how quickly time passes when we have so much to do.

## Science

We have learned to:

During our field trip we discussed how to maintain the beauty of our country. The children came up with good suggestions, such as: not littering, beginning a community project of keeping the neighbourhood clean, extending what we have learned to keeping our rivers clean. We learned how waste water is treated.

**Wishing all students and parents a wonderful holiday season, and a prosperous 2023.**

The beginning— fresh and eager

Topics students' made Egyptian Mummies.

The end—wary and filled with wonder
