

## Literacy

This week, the children carried out a role play from the scenes of Macbeth, another play, written by the famous poet Shakespeare. Then they wrote a summary of the story to show more understanding. In grammar, the children have looked into the form of subjunctive verb. How to recognise certain verbs and expressions, and how to give advice using this form. The children have also practiced writing contractions as it is applicable in their future writing activities.

## Math

This week, the children have continued to practise plotting points and drawing polygons in two quadrants. They also had a quick revision on translation and worked on translating polygons in their new coordinates.

The children have also done their Stage 10 Fab challenge which covers multiplication and division.

We have also drawn a conversion graph of imperial to metric units and use it to read off equivalent measures.

## Science

In Science, the children have continued their learning about the properties and changes of materials. This week, the children have planned and carried out an investigation using tin cans, plastic tumbler, card-based cup and glass jam jar to explore thermal insulating properties. They have looked further into the scientific words used for this topic and have used it in their reports. They have recorded and presented their findings and have identified the best materials for keeping liquids hot or ice cold.

## Important Notice

- School Photo on January 16-17. Please make sure to wear your blue uniform on the 16th.
- Swimming next week Jan. 16 will be group 2: Hong, Jinghao, Sodawin, Kim Sorng, Jingsing, Lee Meng, Panjie, Kimheng Thong.
