

## FIELD TRIPS AT ISSR DEVELOP HOLISTIC MINDS

We aspire to give our students of ISSR holistic development experiences during their school years which assists them to grow up to become global citizens. As important as it is to learn Math and English, it is equally necessary that our students receive a proper education in the arts and as well, are taken on field trips. Giving equal weightage to both indoor, as well as, outdoor activities is what will make children well prepared for what lies outside in the real world. Unfortunately, most schools tend to treat field trips as a novelty rather than a necessity, **we do not think this way**. Let us tell you why field trips should be given due importance and how it contributes to a well-rounded education.

## 1. INTERACTIVE LEARNING

Field trips allow students to interact with what they are learning. The experience goes beyond reading a concept in a textbook as children are able to participate in it physically.

## 2. ACCESS TO DIFFERENT ENVIRONMENTS

Field trips allow students direct access to tools and environments that they otherwise wouldn't have contact with at school. They begin to see that what they learn in the classroom can help them solve real world problems and this shapes them as people.

## 3. SOCIAL INTERACTION

Leaving the classroom for a field trip places students in a different social environment. They get to meet a new set of adults and possibly interact with other children during the course of the field trip. These new interactions give them a vital lesson on how to behave in different settings. What a field trip also does is foster a sense of teamwork and community among the students as they experience a new environment together.

## 4. SOCIO-ECONOMIC GROWTH

## 5. ERASES CLASSROOM BOREDOM

School field trips build in children a different level of excitement and fun. It gives them something to look forward to. These trips give students an interest to learn and get new learning information. Hence, field trips can bring one dimensional lessons to life and create interest for a subject, something that is hard to duplicate through classroom lectures.

To put it simply, students who go on field trips tend to become more empathetic and tolerant. Going on a field trip enhances their critical thinking skills and gives students a chance to think about a topic or theme from a different perspective. A school trip gives students the chance to experience new venues.

## STUDENTS ASSEMBLY

Ms. Dimple, a year 5A teacher and also a coordinator does the assembly with students. The purpose of a student assembly is to provide a platform for students to communicate, and share information about important event that will come up. Student assemblies can also serve as a way to foster a sense of community, identity, and values among students and teachers.

**STUDENT COUNCIL** **EVERYONE**  
**NOTES.** **deserves a**  
**VOICE**

The ISSR Student Council has been working hard, meeting every fortnight to discuss school life. They have discussed the things that are important to them and voted on what they will work on. They have currently been designing badges for School Council members as well as discussing how to make ISSR more environmentally friendly. Many School Council members have also volunteered to take on an extra project to make a video about the school.

## STAR OF THE MONTH

Every month, we recognize one student who has shown outstanding academic performance, leadership skills, and community involvement. The star of the month for students is a prestigious award that honors the achievements and contributions of our learners.
