Thursday 12th October 2023

SCIENCE

Y6B have gained more understanding of the food chains and food webs. They have now fully grasped how the energy source from the producers like plants transfer to the consumers like animals. We have also discussed how not only energies can be transferred but also toxins which are natural and inorganic chemicals. They have discovered how microplastics make their way up the ocean food chain into the fish.

The children's work wall in science showcasing their diagram on food chains

LITERACY

This week, the students spelled new sight words and number-related words, as well as writing the words in their syllabic form and identifying their word class. They have listened to an audio file of a wild wind and come up with many descriptive words to describe what they heard. They reviewed figurative language to further understand how it creates imagery beyond the literal.

They listened to some rap poetry and planned and delivered their very own rap poetry performance. It was very interesting and exciting!

MATHEMATICS

This week's mathematics lesson was fun! The children learned more about specific names of quadrilaterals and have identified lines of symmetry by cutting shapes and folding. They have identified the number of angles, parallel sides, and diagonals of each quadrilateral. We have studied the parts of the circle and have become more proficient in constructing circles with any given radius or diameter.

Swimming with MS. Kira

Swimming: Group 2.

Seng, Kodom, Beato, Dara,
Ellin, Kimhor, Linna and Jessica.

PE: Group 1.

Dalin, Dalika, Gangyeon, Narsha,
Cameron, Amarin, Longking, Kohav,
Veninh

Swimming Reminders:

- MAKE SURE TO BRING YOUR SWIMMING SUITS/ SHORTS AND SWIMMING SHIRTS.
- BRING YOUR CAPS, GOGGLES AND FLIP FLOPS
- MAKE SURE TO BRING EXTRA CLOTHES TO CHANGE INTO AFTER SWIMMING.
- BRING YOUR TOWELS.

DOING A PRESENTATION ABOUT PCHUM BEN

Art and design

The children had been doing a lot of excellent artwork in their arts and design class. Just recently, we've worked on some artistic collage and abstract painting related to space exploration.

The Y6B visiting the Y5's classroom "Museum". The children had an amazing time asking appropriate questions to gain more knowledge about the Year 5's exhibit.

DON'T FORGET

- Monday, 23rd October 2023 - Back to school
- Do all your homework.
- Arrive to school before the bell rings.
- Be careful with your workbooks and student books during this holiday.

Have a wonderful holiday!
