MR. ELLIOT'S CLASS

Friday 17 November 2023

## WEEK HIGHLIGHTS

- Visiting the Angkor Wildlife and Aquarium Center was a thrilling experience! Students enjoyed observing many different species from around the planet.
- We turned our classroom into a Dinosaur Museum for the School Fair this weekend.
- We shared many ideas about the importance of giving to those who are less fortunate.

Inside the jaws  
of a Megalodon!

Speaking Practice

## LITERACY

This week in Literacy, we focused on speaking skills. We revisited what key strategies to use to catch the attention of an audience and communicate your ideas and opinions with impact.

We linked this to Science, where we have started learning about the human brain. Students brainstormed what they already knew about the brain and shared this information with the class by presenting their ideas. Audience members practiced active listening skills and responded with their own feedback.

## FIELD TRIP

Our trip to the Angkor Aquarium and Wildlife center was unforgettable!

We saw hundreds of different species from around the world and asked lots of questions. It was a great experience putting what we have learned in Science about living organisms into a real-life context.

## MATHS

In Maths this week, we completed our learning about 3D shapes, this time finding different ways to sort them based on properties.

We learned what properties means and explored a variety of shapes that look and felt different.

Students are now confident in distinguishing 3D shapes from one another and can identify prisms with more confidence.

## SCHOOL FAIR

**Saturday 18 November**

Year 3 will be opening Siem Reap's first Dinosaur Museum!

This project was student-led and student-designed. We are so excited to welcome you and take you back millions of years!

## DATES TO NOTE

- **November 18**  
School Fair.
- **November 26-28**  
Water Festival Holiday
- **December 15**  
Christmas Concert
- **December 15 - Jan 5**  
Christmas Holiday.
- **January 8**  
Start of Term 3.
