## NUMERACY

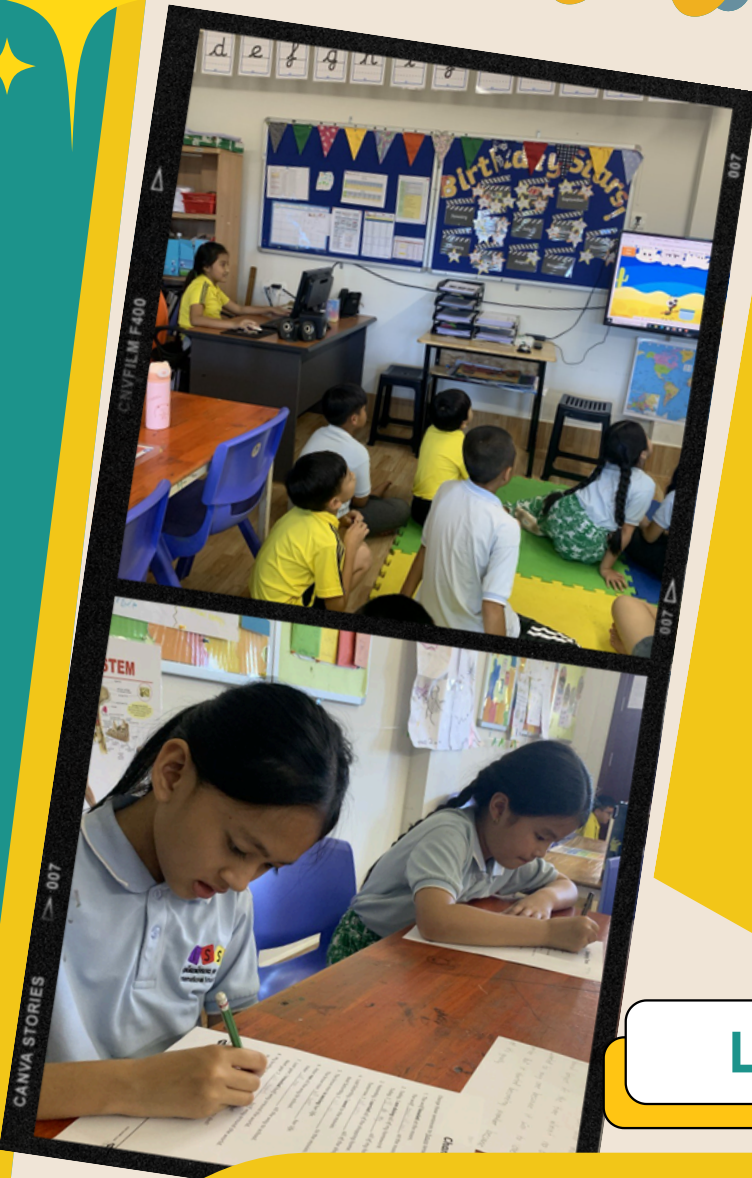

This week in numeracy, the students have been fully immersed in revising their 2D and 3D shapes knowledge. The week started with an interactive lesson introducing students to various 2D shapes. They engaged in hands-on activities where they had to identify and classify these shapes based on their properties.

## LITERACY

This week in Year 4, students have been diving into verb tenses in their literacy revision.

The week began with an introduction to the different tenses of verbs, including past, present, and future. Students engage in interactive activities and exercises to practise identifying and using verbs in different tenses.

As the week progressed, the focus shifted to understanding the rules and patterns of verb tense usage. Students worked on constructing sentences using the correct tense and were encouraged to express themselves creatively through writing.

# SCIENCE

Our Science revision focused on learning about planets in our solar system. The week kicked off on the different planets that orbit around the sun.

The mix-and-match puzzle activity proved to be a fun and effective way to reinforce their learning and solidify their knowledge of the planets.

Their enthusiasm and engagement in the activities showcased their growing interest in the world of science and the mysteries of the universe.

# DAILY MILE

Year 4 taking on  
the Daily Mile  
challenge with  
smiles and  
determination!
